

## Estimated COMPRESSED AIR leak cost

Calculated with an around 6000 hours / year running plant (3x8 without week end), with a 150 Wh/Nm<sup>3</sup> air production consumption under 7 Bar pressure and with a 0.065 €/kWh electrical cost.

Imagine now, if you find around 100 x 0.6 mm leaks + 30 x 1mm leaks + 10 x 3.4mm leaks, the leaks cost is around **45.500 €/year**. Our leak detection camera LEAKSHOOTER LKS1000 cost only around **2.500 €...**

Do not hesitate, buy a LEAKSHOOTER LKS1000, find the leaks easily, make the repairs, save a lot of money and avoid energy waste!!!

**LEAKSHOOTER LKS1000, the first leak detection camera easy to use, efficient, with photo capture capabilities, to find compressed air leaks and to save money and energy.**
